WHAT IS ADAS?

Advanced Driver Assistance Systems (ADAS) are electronic technologies designed to increase safety and reduce accidents by providing the driver with warnings of possible collision and correcting vehicle speed and/or steering.

It is estimated that ADAS technology could prevent over 60% of all crashes. By 2025, 85% of all vehicles on the road will utilize some degree of driver automation.

VSSTA is here to provide you with the latest technologies in ADAS calibration. We'll help you add additional profit to your repair shop and protect your shop's liability.

VSSTA

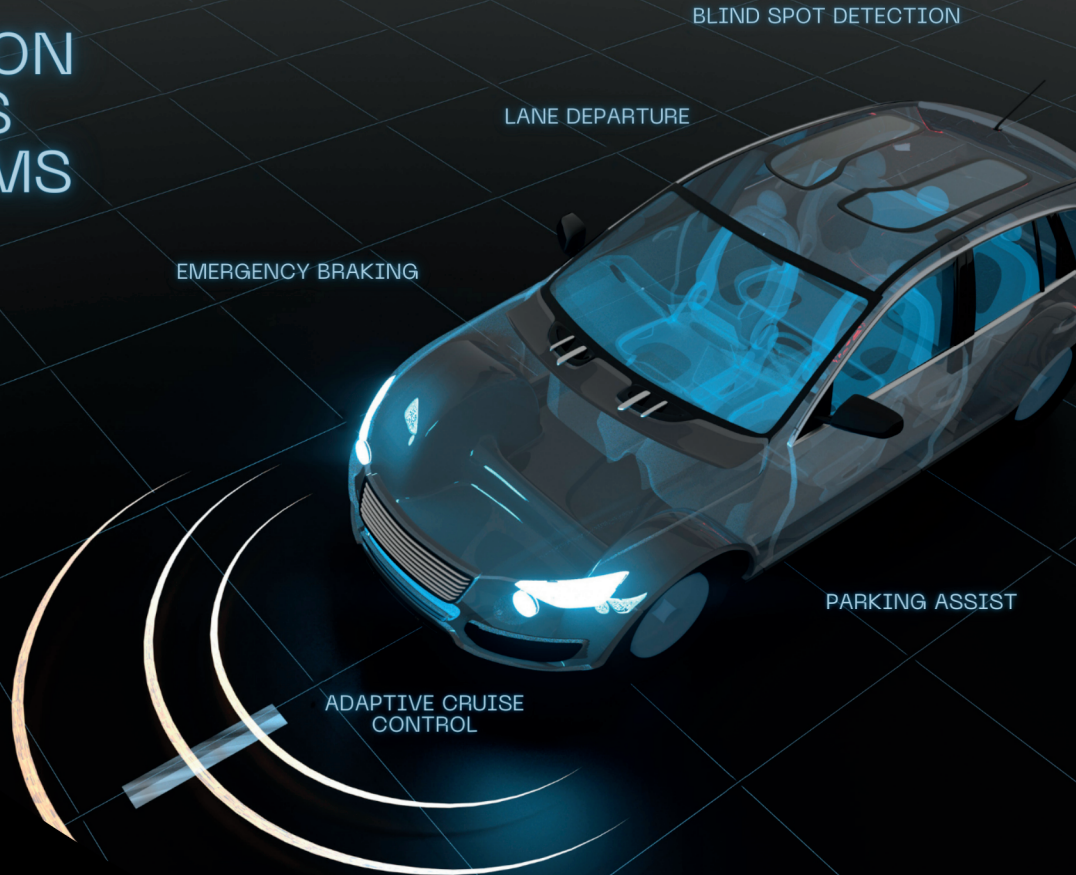

FEATURES & BENEFITS

- Guaranteed Monthly Profit
- Average 7 Minute Scan Time
- Unlimited Tech Support
- Secure Document Storage
- Protect Liability
- No Device Update Fee
- Missed Scan Alerts*
- ADAS Identification*

*Requires management system integration

COMMON ADAS SYSTEMS

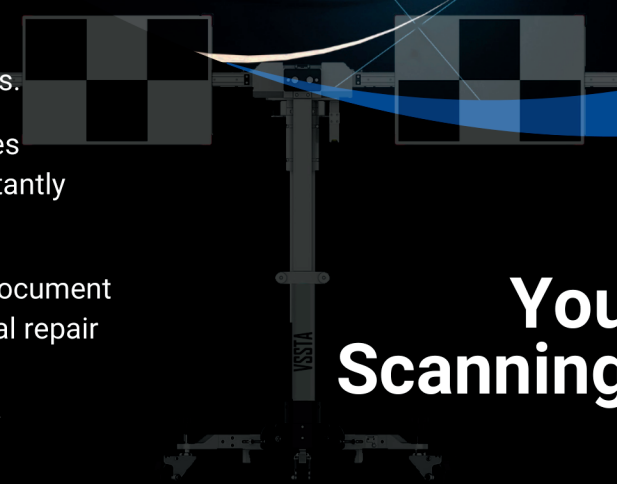

HOW IT WORKS

VSSTA scan tool integration allows you to perform system calibrations and diagnostic scans.

VSSTA's online portal then utilizes documents and scan data to instantly identify opportunities for repair.

VSSTA will help with reporting, document storage, and identifying additional repair operations in real time. Support technicians are just a click away.
